**Subject:** Revised - For Enrique/Angeles - Followup to concerns from Steve Aronovsky RE: Environmental Violations by Criminal Developer, Lennar, in San Francisco, California

Here's a revised version:

Dear Enrique,

As you requested, here is a draft response to Carol Rushin:

Dear Carol,

Thank you for forwarding Mr. Aronovsky's message. My staff has contacted him multiple times, and attached is our formal reply for your reference. To add to Alexis' message, the Navy is the lead on cleaning up the closed Hunters Point Naval Shipyard NPL site as part of the national base closure process. The City of San Francisco and its developer Lennar Urban is developing a new mixed-use project with housing, commercial and retail properties, open space, and community amenities. EPA's role has included not only regulatory oversight of the CERCLA cleanup process but also supporting technical assistance, job training, and environmental assessments in the surrounding EJ neighborhood. EPA is the lead on cleanup of sediment at the adjacent Yosemite Slough, together with partners such as California State Parks. We have a cleanup plan based on sediment studies, and we are now negotiating with responsible parties to design and implement the cleanup. EPA is not involved in Candlestick Park, but the City of San Francisco has overseen soil testing and a mitigation plan.

Over decades, community residents in the Bayview Hunters Point EJ community have expressed concerns about many issues, including radiation and chemical exposure to current and future residents, a landfill fire, construction dust during redevelopment, neighborhood truck traffic, subsistence fish consumption, gentrification, and job creation. EPA is working with the Navy, the City, and other agencies to address those concerns through requiring best practices during cleanup and construction and multi-agency inspections and enforcement. We have worked with the community through technical assistance grants that enabled local leaders to conduct independent reviews of Navy reports and proposed plans. Brownfields grants are training hundreds of local youth for local jobs and testing nearby neighborhood sites for developing open space and other community benefits. Please let me know if you'd like any more information about Hunters Point environmental issues.

- Enrique

I know we received this same request/demand. Did we respond in some way?

I would like to send something back to Carol that explains the background, the continuing complaints by some, and what our role vs Navy has been and continues to be. Next week?

Thanks. Hunter's Point is a Superfund NPL site. Over the past two decades, there have been tensions over the clean-up (by Navy) and development (by Lennar) of the site, including particular attention to

Yosemite Slough by the State oversight agencies and EPA Region 9. While I leave any criminal inquiry to Jay, I'm copying Enrique, our Superfund Director, for his awareness. Thanks, A
